

A Quick Guide to CAM and Other Innovative Treatments

Compiled by Ralph Moss

Well Researched

Acupuncture
Angiogenesis inhibitors
Anthroposophical med.
Antineoplastons
Antioxidants
Asian mushrooms (all)
BCG
Bilwa
CarTCell shark cartilage
Cat's Claw
Chlorella
Chronotherapy
Cimetidine (Tagamet)
Coffee enemas
Coix/Kanglaite
Coley's toxins
Cromolyn
Colostrum/transfer factor
Cytokine therapy
Dendritic cell vaccine
Differentiation therapy
Enzymes, proteolytic
Ex vivo analysis
Fever therapy
Galvanotherapy (EchT)
Gerson therapy
Glutamine/glutathione
Homeopathy
Hyperthermia
IL-2, low-dose
Immunotherapy
Insulin potentiation therapy
Issels program
Kelley-Gonzalez method
Macrobiotics
Melatonin
MGN3/BioBran
Mistletoe
Modified citrus pectin
Newcastle (NDV) vaccine
Pau d'arco
Radiofrequency ablation
Saffron
SeaCure
Spirulina
Sun Soup

Status Unclear

AHCC
AMAS test
Amino acid therapy
Artemisinin
Biological dentistry
Chaparral
C-statin
Darkfield microscopy
DMSO
Electrodermal screening

Haelan 951
Heat shock proteins
Hoxsey herbs
Hydrazine sulfate
IAT
Jason Winters tea
IP-6
Jiaogulan
Kirlian photography
Kloss formula
Laetrile (amygdalin)
Live cell therapy
Marijuana
Naessens/714X
Naltrexone, low-dose
Nanotechnology
NeyTumourin
Noscapine
Oleandrin
PC SPES
PolyMVA
Rath, Matthias therapy
Red root/burdock
Sanum remedies
Thymus peptides
Ukrain
Urea-creatinine
Vitamin C IV

Poorly Researched

Alivizatos
Autohemotherapy
Bioresonance
Black salves
Cancel/Cantron
Carnivora
Cesium chloride
Chelation, EDTA
Clark method
Escozul
Essiac/Flor•Essence
Galavit
Goji
Graviola
Hydrogen peroxide
Hyperbaric oxygen
Methylglyoxal
Mangosteen
Noni juice
Ozone
pH therapy
Rife therapy
Tangeretin
Tian Xian
Ultraviolet blood irradiation
Urine therapy
Yu therapy
